

Intelligent Life.

Does IT speak sound like Martian to you?

No matter how smart the programmers were - off the shelf cookie-cutter IT solutions can be confusing, intimidating, and honestly a real pain.

We've spent decades learning the wine industry and identifying best-of-breed solutions that fit its specific needs. We can help you with your existing software systems, recommend new ones, or anything in between.

We free up you and your staff to make great wine and engage customers. This pumps cash directly to your bottom line.

The Grape Squad will maintain, plan, and deploy your IT so you can crush your goals AND still have time to savor life.

That's real intelligence.
